

International VAT recovery agents

Special offer for VAT agents

Do you recover VAT for your clients and search for a fully legal bank solution to manage cash flow? Banka CREDITAS has the right solution for you. Custom made banking for VAT agents solves the most pressing issues which you encounter.

Main advantages

Open real accounts for your clients

We do not operate virtual accounts. We provide legitimate proof of a bank account holder on every account. You do not need to pretend any more to tax authorities that the bank accounts belong to the client.

Tailor-made fees

We understand your business and thus are able to scale the banking solutions accordingly. We charge a flat monthly fee which covers the opening of new accounts and all cash flow involved. No additional hidden fees. We scale our fee as your business grows.

Real-time sweeping and security over your clients' funds

All incoming refunds from tax authorities are automatically swept to your main company account in real-time. You also have priority over your clients' account funds in case of client bankruptcy. Your clients cannot access their bank account.

Tailor-made paperwork

Our product is designed to take into consideration your business workflow needs. The paperwork requirements are designed to cause minimum disruption to the relationship with your clients and the overall sign-up process.
